

DBMS LAB ASSIGNMENT

NAME: Bipul Gautam

REG.: 19BCS023

1.) Add, Modify and Delete column using alter command.

Add:

The screenshot shows the SQL Server Enterprise Manager on the left, connected to 'localhost (SQL Server 15.0.2000.5 - SAI-GANESH\ganes)'. The 'Hotel' database is expanded, showing 'Tables' > 'dbo.Customer'. The columns listed are: customerid (PK, int, not null), Name (varchar(45), not null), Roomnumber (varchar(45), not null), phonenumber (varchar(45), not null), and email (varchar(10), null). On the right, the SQL Query Editor shows the following commands:

```
use Hotel;  
  
alter table Customer  
add email varchar(10);  
  
alter table Customer  
alter column email varchar(45);  
  
alter table Customer  
drop column email;
```

The Messages pane at the bottom shows: 'Commands completed successfully.' and 'Completion time: 2021-02-19T14:33:09.6652254+05:30'.

Modify:

The screenshot shows the SQL Server Enterprise Manager on the left, connected to 'localhost (SQL Server 15.0.2000.5 - SAI-GANESH\ganes)'. The 'Hotel' database is expanded, showing 'Tables' > 'dbo.Customer'. The columns listed are: customerid (PK, int, not null), Name (varchar(45), not null), Roomnumber (varchar(45), not null), phonenumber (varchar(45), not null), and email (varchar(45), null). On the right, the SQL Query Editor shows the following commands:

```
use Hotel;  
  
alter table Customer  
add email varchar(10);  
  
alter table Customer  
alter column email varchar(45);  
  
alter table Customer  
drop column email;
```

The Messages pane at the bottom shows: 'Commands completed successfully.' and 'Completion time: 2021-02-19T14:40:15.9388972+05:30'.

Delete:

The screenshot shows the SQL Server Enterprise Manager interface on the left, displaying the 'Hotel' database structure. The 'dbo.Customer' table is selected, showing columns: customerid (PK, int, not null), Name (varchar(45), not null), Roomnumber (varchar(45), not null), and phonenumber (varchar(45), not null). The 'Columns' folder is expanded, and 'dbo.Customer' is selected. The SQL Query Editor on the right contains the following commands:

```
use Hotel;

alter table Customer
add email varchar(10);

alter table Customer
alter column email varchar(45);

alter table Customer
drop column email;
```

The Messages pane at the bottom indicates: "Commands completed successfully." and "Completion time: 2021-02-19T14:46:27.3283846+05:30".

2.) Insert 20 employees Data into all the tables.

```
use Hotel;

insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (1, 'peter', '001', '8754321987');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (2, 'chen', '002', '9514863258');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (3, 'rosy', '003', '7531598526');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (4, 'gill', '004', '8524569631');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (5, 'rio', '005', '7896321456');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (6, 'professor', '006', '8426957130');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (7, 'langford', '007', '7254796318');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (8, 'justin', '008', '9571536293');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (9, 'bobby', '009', '7564218930');
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (10, 'bob', '010', '9658741230');
```

```
insert into Customer
values (11, 'cristen', '011', '7895621301');
insert into Customer
values (12, 'kamal', '012', '4862159735');
insert into Customer
values (13, 'dinesh', '013', '6547893215');
insert into Customer
values (14, 'abcd', '014', '2589641375');
insert into Customer
values (15, 'mona', '015', '1258974631');
insert into Customer
values (16, 'raj', '016', '1589746238');
insert into Customer
values (17, 'kumar', '017', '8459761238');
insert into Customer
values (18, 'edfh', '018', '4879635428');
insert into Customer
values (19, 'mahesh', '019', '8796532485');
insert into Customer
values (20, 'dhoni', '020', '4897563215');
```

Output:

```
select * from Customer;
```

3.) Show Violation of primary key, Unique not null and default key constraints through insertion.

Primary key violation:

```
use Hotel;  
  
insert into Customer(customerid, Name, Roomnumber, phonenumber)  
values (1, 'steve', '51', '9876543210');
```

Messages
Msg 2627, Level 14, State 1, Line 3
Violation of PRIMARY KEY constraint 'PK_Customer_B61ED7F594288BA1'. Cannot insert duplicate key in object 'dbo.Customer'. The duplicate key value
The statement has been terminated.

Completion time: 2021-02-19T15:44:49.1809528+05:30

Null key violation:

```
/* null key violation */
insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (22, null, '150', '8796541230');

select * from Customer;
```

```
Msg 515, Level 16, State 2, Line 7
Cannot insert the value NULL into column 'Name', table 'Hotel.dbo.Customer'; column does not allow nulls. INSERT fails.
The statement has been terminated.

Completion time: 2021-02-19T15:53:43.3520069+05:30
```

4.) Insert tuples into the table and see how foreign key constraint works if you try to insert into dependent table first.

```
use Hotel;

insert into Receptionist
values (1, 'kidinesh', '9654178235', 1, null);

select * from Manager;
```

```

% Messages
Msg 547, Level 16, State 0, Line 3
The INSERT statement conflicted with the FOREIGN KEY constraint "FK_Reception_rooms_402ASC7D". The conflict occurred in database "Hotel", table "Reception_rooms", row 1.
The statement has been terminated.

Completion time: 2021-02-19T16:38:35.4984113+05:30

```

5.) Show violation of foreign key constraint when you try to delete from a base table. If you get an error explain why deletion gives an error.

```
use Hotel;

delete from Stock where stockid = 2;
select * from Stock;
```

150 %

Results Messages

Msg 547, Level 16, State 0, Line 3
 The DELETE statement conflicted with the REFERENCE constraint "FK_Room_stockid_38996AB5". The conflict occurred in database "Hotel".
 The statement has been terminated.

The error occurs because when we delete a record from the base table, we show make

sure that all the related dependent tables records are deleted prior. Otherwise, there will be redundant data all over the database.

6.) Try to update a non-existing entity data and check for error.

```
use Hotel;  
  
update Customer  
set Name = 'kidnesh'  
where customerid = 30
```

Completion time: 2021-02-19T17:00:27.7906657+05:30

7.) Add a column which has default value.

```

use Hotel;

alter table Customer
add email varchar(45) default 'test@gmail.com';

insert into Customer(customerid, Name, Roomnumber, phonenumber)
values (21, 'bobby', '021', '7896541230');

select * from Customer where customerid = 21;

```

%

Results Messages

customerid	Name	Roomnumber	phonenumber	email
21	bobby	021	7896541230	test@gmail.com

8.) 5 Simple select queries to retrieve data from your database.

```

use Hotel;

select * from Stock;
select * from Room where stockid = 1;
select roomid, customerid from Receptionist where Name = 'priya';
select Name, customerid from Manager;
select * from Customer
where customerid in (select customerid from Manager where Name = 'daniel');

```

2	9	bobby	009	7564218930
3	16	raj	016	1589746238

9.) Show how foreign key constraint effects updating a dependent table when value not existing and in base table where the value is referred and you want to update it.

```
use Hotel;  
  
update Room set stockid = 1 where roomid = 7;
```
